BUILDING A SUSTAINABLE TOMORROW

COMPANY OVERVIEW

About HYSUN GREEN

HYSUN GREEN CONTRACTING L.L.C. is an integrated construction and project support company registered in Dubai, UAE, serving the UAE, Saudi Arabia and neighbouring markets.

Our core services cover PV construction, power cable works, building construction, MEP construction, temporary facilities and logistics support. We organise site personnel, equipment, construction activities, materials and logistics, while supporting quality inspections, progress management and project handover.

With practical experience on Middle East project sites and access to Chinese supply chains, HYSUN GREEN continues to develop resource coordination across the UAE, Saudi Arabia and China, providing flexible, efficient and practical construction support for renewable energy, power, building, MEP and related infrastructure projects.

Professional Construction

Focused on site execution and practical delivery.

Integrity & Efficiency

Transparent communication, rapid response and efficient execution.

Cross-Regional Resources

Coordinating project and supply chain resources in the UAE, Saudi Arabia and China.

Project Coordination

Coordinated construction, equipment, materials, logistics and quality management.

The Dubai trade licence covers building contracting, electromechanical works, electrical fitting, electric power lines, power station works, transmission and control equipment installation, and alternative energy equipment installation and maintenance. All activities remain subject to the valid licence, relevant permits and the specific project contract.

VISION & MISSION

Our Vision

To become a trusted long-term construction partner in the Gulf region, strengthening site execution capabilities in renewable energy, power, building and MEP works, and developing an engineering and supply chain platform connecting China and the Middle East.

Our Mission

To turn safety, quality, efficiency and responsibility into effective site organisation, execution, resource coordination, quality acceptance and handover, creating sustainable value for our clients.

Core Values

Safety

Prioritising personnel safety and construction risk control.

Quality

Ensuring delivery through process controls, inspections and corrective actions.

Efficiency

Mobilising resources quickly and reducing waiting and communication delays.

Integrity

Maintaining transparent communication and traceable project management.

Coordination

Strengthening cooperation across disciplines, crews and resources.

Execution

Focusing on practical site delivery, quantities, progress and final results.

Professional Construction | Integrity & Efficiency | Shared Success

MAIN CONTRACTING SERVICES

Our core services are organised around construction execution and project support, covering the following six areas.

PV CONSTRUCTION

- Solar piling works
- PV mounting structure installation
- PV module installation

POWER CABLE WORKS

- MV cable installation
- LV cable installation
- Cable laying and jointing
- Cable testing and commissioning

BUILDING CONSTRUCTION

- Civil and structural construction
- Masonry works
- Interior fit-out and finishes
- External and ancillary works

MEP CONSTRUCTION

- Electrical works
- Plumbing and drainage
- HVAC works
- Fire protection systems
- Equipment installation and commissioning

TEMPORARY FACILITIES

- Temporary camp construction
- Office and accommodation units
- Fencing and temporary facilities
- Temporary water and power installation

LOGISTICS & SUPPORT

- Vehicle rental and transport
- Food and daily supplies
- Office supplies and furniture
- Temporary facility construction support
- Integrated site logistics support

The business presentation follows the same brand system as the company business cards. Actual scope, quantities, technical standards and commercial boundaries are governed by project drawings, BOQs, contracts, work instructions and relevant approved documents.

PV CONSTRUCTION

HYSUN GREEN can participate in site construction and installation for utility-scale solar power plants and renewable energy projects, mobilising personnel, machinery and site management resources to meet project plans. The team has experience in piling, mounting structures, modules and cable works on large solar projects in Saudi Arabia.

MAIN SCOPE

- Solar piling works
- PV mounting structure installation
- PV module installation
- Surveying, setting out and site support
- Quality checks, QC acceptance and corrective actions
- Coordination of site personnel, vehicles and machinery

Equipment installation, commissioning and electrical connection scope are defined by the project contract and technical documents.

Site Organisation

Mobilise personnel, crews and management resources to suit the project plan.

Plant & Equipment

Coordinate machinery, tools, vehicles and construction equipment.

Quality Acceptance

Support WIR/MIR, QC inspections, corrective actions and acceptance closure.

Progress & Execution

Track daily quantities, construction progress and site coordination matters.

POWER CABLE WORKS

For renewable energy, power station and infrastructure projects, we undertake power line and cable installation works, coordinating pulling equipment, rollers, lifting resources and construction personnel according to route conditions.

MAIN SCOPE

- MV cable installation
- LV cable installation
- Cable laying and jointing
- Support for cable testing and commissioning
- Cable pulling, rollers and equipment coordination
- WIR/QC inspections and acceptance support
- Daily quantity tracking and progress management

The trade licence includes electric power lines and related power engineering activities. Voltage levels, testing scope and interface responsibilities are subject to project technical documents and the contract.

Site Organisation

Mobilise personnel, crews and management resources to suit the project plan.

Plant & Equipment

Coordinate machinery, tools, vehicles and construction equipment.

Quality Acceptance

Support WIR/MIR, QC inspections, corrective actions and acceptance closure.

Progress & Execution

Track daily quantities, construction progress and site coordination matters.

BUILDING CONSTRUCTION

Within the company licence and project requirements, HYSUN GREEN can undertake building and related civil works, organising resources for structural works, masonry, fit-out and external works.

MAIN SCOPE

- Civil and structural construction
- Masonry works
- Interior fit-out and finishes
- External and ancillary works
- Construction crew and machinery mobilisation
- Progress, quality and site coordination

The scope of building works, design responsibilities, specialist subcontracting and approval requirements are subject to local regulations, the valid company licence and the project contract.

Site Organisation

Mobilise personnel, crews and management resources to suit the project plan.

Plant & Equipment

Coordinate machinery, tools, vehicles and construction equipment.

Quality Acceptance

Support WIR/MIR, QC inspections, corrective actions and acceptance closure.

Progress & Execution

Track daily quantities, construction progress and site coordination matters.

MEP CONSTRUCTION

Drawing on Chinese MEP project experience and local Middle East resources, we provide mechanical, electrical and equipment installation support for building, energy and industrial projects, including interdisciplinary coordination, testing and acceptance support.

MAIN SCOPE

- Electrical works
- Plumbing and drainage works
- HVAC works
- Fire protection systems
- MEP equipment installation and commissioning
- Power transmission and control equipment installation support
- Interdisciplinary coordination and quality acceptance

System scope, equipment brands, commissioning responsibilities and authority or third-party acceptance requirements are subject to approved drawings, specifications, material approvals and contract boundaries.

Site Organisation

Mobilise personnel, crews and management resources to suit the project plan.

Plant & Equipment

Coordinate machinery, tools, vehicles and construction equipment.

Quality Acceptance

Support WIR/MIR, QC inspections, corrective actions and acceptance closure.

Progress & Execution

Track daily quantities, construction progress and site coordination matters.

TEMPORARY FACILITIES

For large energy, industrial and building projects, we organise temporary camps, office and accommodation units, fencing, temporary facilities and temporary water and power services according to site needs.

MAIN SCOPE

- Temporary camp construction
- Office and accommodation unit installation
- Fencing and temporary facilities
- Temporary water and power installation
- Site layout and supporting works coordination
- Dismantling, relocation and reinstatement support

Temporary facilities can be configured to suit project duration, site conditions, headcount and client standards. Material specifications, fire safety, electrical and safety requirements are governed by project rules.

Site Organisation

Mobilise personnel, crews and management resources to suit the project plan.

Plant & Equipment

Coordinate machinery, tools, vehicles and construction equipment.

Quality Acceptance

Support WIR/MIR, QC inspections, corrective actions and acceptance closure.

Progress & Execution

Track daily quantities, construction progress and site coordination matters.

LOGISTICS & SUPPORT

Large project sites require reliable vehicles, transport, daily supplies, office materials and logistics in addition to construction. Drawing on Middle Eastern and Chinese resources, we provide flexible support suited to project scale.

MAIN SCOPE

- Vehicle rental and transport services
- Food and daily supply provision
- Office supplies and furniture
- Temporary facility construction support
- Material and site supply delivery coordination
- Integrated site logistics support

Logistics services can be provided independently or integrated with construction projects to reduce the client's coordination burden across multiple suppliers.

Site Organisation

Mobilise personnel, crews and management resources to suit the project plan.

Plant & Equipment

Coordinate machinery, tools, vehicles and construction equipment.

Quality Acceptance

Support WIR/MIR, QC inspections, corrective actions and acceptance closure.

Progress & Execution

Track daily quantities, construction progress and site coordination matters.

SAUDI ARABIA PROJECT EXPERIENCE

2,000 MW SADAWI SOLAR POWER PROJECT

Project Name	2,000 MW SADAWI Solar Power Project
Location	Saudi Arabia
Project Type	Utility-scale solar power project
Scope of Work	Solar piling, PV mounting structures, PV module installation, MV cable laying and related site construction
Project Role	Construction execution, site organisation and project coordination

The HYSUN GREEN team participated in site construction works for the 2,000 MW SADAWI Solar Power Project in Saudi Arabia. Experience includes solar piling, mounting structures, PV modules, MV cables and site organisation, further developing resource coordination, quality acceptance and execution capabilities in a utility-scale renewable energy environment.

MAIN PROJECT ACTIVITIES

- Solar field piling
- PV module installation
- Cable pulling and construction organisation
- Winch and construction equipment coordination
- Construction progress management
- Quality corrective actions and site coordination
- PV mounting structure installation
- MV cable laying
- Personnel and crew management
- Site machinery coordination
- QC inspections and acceptance support
- Coordination between construction teams

CHINA TEAM PROJECT EXPERIENCE

HUACHEN INTERNATIONAL HOTEL

Project Name	Huachen International Hotel Development Project
Location	16 Qianheyan East Road, Linxia, Gansu, China
Project Type	Building construction, interior fit-out and MEP supporting works
Overall Scale	Total gross floor area: 59,539.08 m ² ; hotel building: 23 above-ground floors and 1 basement
Scope of Work	Building and related civil works, fit-out, MEP and electrical installation, pipework and equipment support; site organisation, progress coordination and quality acceptance support
Team Role	Participation in construction, crew organisation, site coordination and quality inspections

The Chinese team's project experience covers building construction, interior fit-out and MEP supporting works for the Huachen International Hotel development. Based on the contracted works and the building contracting, electromechanical and electrical fitting activities in HYSUN GREEN's trade licence, this case illustrates the team's participation in building works, fit-out and multidisciplinary MEP coordination.

MAIN PROJECT ACTIVITIES

- Building and related civil works organisation and support
- Partitions, light-gauge steel framing and ceilings
- Electrical conduit embedment, laying and installation
- Pipework, equipment and multidisciplinary interface support
- Progress planning and site resource coordination
- Site safety management and good housekeeping
- Structural, masonry and ancillary building works coordination
- Fit-out, waterproofing and related supporting works
- Plumbing, drainage and supporting MEP installation
- Personnel mobilisation, crew organisation and material preparation
- Quality inspections, rectification and acceptance support
- Handover coordination and construction documentation support

Areas and floor counts refer to the overall project. This case represents the Chinese team's participation; the actual construction scope is governed by the contract, drawings and BOQ.

HSE & QUALITY

Safety and quality are central to HYSUN GREEN's project execution. In line with client requirements, project rules and site conditions, we implement safety controls, quality inspections and corrective-action processes.

Personnel Safety

Manage site personnel safety and PPE requirements.

Risk Identification

Identify construction risks and preventive measures before work.

Safety Briefings

Toolbox talks and pre-work safety briefings.

Equipment Inspections

Check machinery, vehicles, tools and equipment.

Procedures

Control construction methods, permits and work processes.

Quality Inspections

Check construction processes and key work stages.

Corrective Actions

Track rectification, reinspection and closure.

QC Acceptance

Support WIR/MIR, QC inspections and acceptance.

Site Housekeeping

Maintain clean work areas, orderly storage and site discipline.

Project Handover

Confirm completion, transfer and final acceptance.

SAFETY FIRST · QUALITY ALWAYS · DELIVER WITH RESPONSIBILITY

WHY HYSUN GREEN

HYSUN GREEN focuses on solving practical project challenges, improving site execution efficiency and building long-term partnerships.

Practical Project Execution

Focused on site construction, quantities, progress, acceptance and final delivery.

Saudi Renewable Energy Experience

Construction and site coordination experience on utility-scale solar projects.

Chinese MEP Experience

A foundation of MEP construction experience and supply chain resources for overseas projects.

Building & MEP Coordination

Coordinating structural, MEP and related construction disciplines.

Rapid Resource Mobilisation

Organise people, machinery, vehicles and site resources to suit project needs.

Temporary Facilities & Logistics

Support temporary facilities, transport, materials and site logistics.

Middle East Site Coordination

Developing local execution and coordination capabilities in the UAE and Saudi Arabia.

Cross-Regional Resources

Coordinating resources across the UAE, Saudi Arabia and China.

We execute work on the basis of project contracts, technical documents, site instructions and local regulations. Unconfirmed scope is not presented as an established commitment.

LET'S BUILD TOGETHER

We look forward to working with you.
